

IS YOUR JOB AT
RISK BECAUSE OF AI

@LEARN.MACHINELEARNING

WHY AUTOMATION??

- Because computers are generally less expensive, less prone to error, and more proficient in some areas than human employees, it's clear that the future of work will increasingly involve robots.
- While this might sound alarming, the study emphasizes that most human jobs will change rather than disappear completely. @learn.machinelearning
- it also comes with a host of new opportunities for engineers looking to break into the industry.

HOW TO PREPARE FOR AUTOMATION

- Pick up new skills
- Go back to school
- Practice adaptability
- Join the robots [@learn.machinelearning](#)
- Instead of creating AI to replace humans, we need to create AI which works with humans.
- Don't worry automation of all these jobs is not near yet, but not far as well.
- Keep learning.
